STDC-50BATT

Description

Our compact and light weight High Output Lithium-ion Rechargeable Trade Show Battery powers our full line of LED Trade Show Exhibit Lights up to 36 hours on a single charge! Once depleted, this versatile device fully recharges in just over 6 hours with our Power Adapter.

Our Trade Show Battery is much more than just a simple battery pack capable of powering our LED exhibit and display lights. It can power your LED light fixtures while charging up. So go off the grid and stop paying those outrageous electric fees at the trade show venues. The High Output Mobile Power Trade Show Battery pays for itself after only one or two events!
